

ERGOMOVER MANIPULATOR

The ErgoMover Manipulator is a unique self-propelled trolley that provides users with **TWO** functions for controlling construction materials.

For example, it can set down stacks of plasterboard on trestles and it can raise a stack of plasterboard to the vertical position.

1200kg max lifting capacity

Technical Specifications	
Lifting capacity (whilst driving)	1200kg
Lifting capacity (whilst tilting)	1100kg
Length without handle	1670mm
Transport loads up-to (in length)	3000mm
Minimum load bed width	698mm
Max load bed width	790mm
Height	565mm
Weight	425kg
Voltage	24v
Max. driving speed	0-6 km/h
On board battery charger	110v
Tyres	Foam filled puncture proof

Lift and tilt functions control material in the best way for construction process

Options

- Long forks for a full pallet of plasterboards (42 sheets)
- Short forks for half pallets (21 sheets)

The ErgoMover can raise a full stack of plasterboards from horizontal to vertical with ease
