

ERGOMOVER GO

The ErgoMover **Go** is a powerful transport trolley without the hydraulic tilting function for applications that require the transport of materials alone.

As with other models, it is equipped with an all-terrain electric motor and 4-wheel steering for excellent performance on construction sites.

1500kg max lifting capacity

360° Rotating Platform
Option available

Technical Specifications

Lifting capacity	1500kg
Length without handle	1680mm
Transport loads up-to (in length)	3000mm
Minimum load bed width	698mm
Max load bed width	790mm
Height	565mm
Weight	311kg
Voltage	24v
Max. driving speed	0-6 km/h
On board battery charger	110v
Tyres	Foam filled puncture proof

Entire Working Day

The ErgoMover Go easily handles loads of up to 1500kg the integrated charger ensures the truck can be operated for the entire working day.

Available with the Wireless Remote Control

Options

- ErgoMover Go – with 360° rotatable platform for continuous rotation of the load.
- ErgoMover Go Cargo – with large platform and lashing points ideal for e.g. transport of glass rack.
- ErgoMover Go XL – for 2x1m ground plates.
- ErgoMover Go XL – low model with 2x1m platform.

The ErgoMover can carry loads of 1500kg at up to 6km/h, making them ideal for transporting heavy loads across site
